Met 426/526   Homework   03_D^{eff}

1. Compute the slope of the line in Figure 2.11 (MST&S/Ironmaking) for the 900 ºC line
    assuming that H2 diffusion in H_2O vapor through the product layer is rate controlling.
    Compare to the slope in the figure. Assume ε/T = 0.6.
